Reasons for Allowance

The following is an examiner's statement of reasons for allowance: Upon reconsideration and further review, taken with applicant's arguments in pages 4-7 of the Brief on Appeal, it is appreciated now that the claimed invention, as presently amended, is directed to a novel and unobvious subject matter. The prior art fails to teach or suggest combining sulfuric acid and ammonium sulfate/urea at the claimed proportions, temperature and pressure for the claimed period of time and then subsequently adding a stabilizer that includes 10 wt% of the original mixture. Therefore, the resultant microbicidal composition and method of making it are deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

It is noted for the record that the new references listed on the attached PTO-892 are being cited to further show the state of the art.
